

Hub Component Kits

- Designed to be sold together with a hub or hubdrum, a real time saver!
- Contains bearings, grease seal options, wheel nuts, and grease cap options.
- Races are *not* included - as they are already pressed into the hubs & hubdrums.
- Boxed and clearly labeled with Part # and Parts Breakdown.
- Priced Right! Available for the most popular combinations!

The ideal solution to stocking hubs and hubdrums and the option of the required parts for a completed assembly.

Each boxed kit includes the bearings, seals (if there is an size option on the seal, they are both included), grease caps (for standard & EZ Lube applications) and the proper wheel nuts for each application.

Available for standard 3500 lb, 6000 lb, 7000 lb (1/2" or 9/16" studs), 8000 lb (9/16" or 5/8" studs).

Save time bagging kits, simplify your inventory, making ordering replacement parts quick and easy
